SKILLS

- System Design & Analysis
- RESTful API & Backend Architecture
- Database Design, Query Optimization
- Caching Strategy (Redis, In-Memory)
- Web Performance Optimization
- JavaScript, Next.js & NestJS
- PHP (Laravel – MVC, REST API)
- MySQL, PostgreSQL & Cassandra
- Docker (Containerization)
- Kubernetes (Container Orchestration)

PROJECTS

Digital Content Management

This application is designed to manage digital creative assets provided by Drizycraft, including SVG designs, crafting resources, and premium downloadable content. It also supports creator management, content categorization, and membership-based access, allowing users to easily explore, download, and utilize digital designs. The primary objective of this application is to increase the visibility of Drizycraft’s creative products and provide users with convenient access to high-quality digital assets for personal and commercial crafting needs.

PROFILE

A dedicated professional with high responsibility and integrity in completing every task. Strongly committed to teamwork to achieve shared goals. Possesses a deep interest in technology and enthusiasm for continuously learning and adapting to the latest developments in the field

EDUCATION

Associate degree

2021 - 2024

Informatics Management | Politeknik LP3I Bandung

WORK EXPERIENCE

POSDIGI

JUL 2025 - PRESENT

Backend Developer

Responsible for the maintenance, enhancement, deployment, and server management of enterprise systems, including Nota Dinas Elektronik (NDE) and Pos Indonesia Online. Also involved in developing a microservices-based e-Contract system from scratch using Go, PostgreSQL, Redis, RabbitMQ, and MinIO, with services containerized using Docker. System monitoring and log aggregation were implemented using Grafana and Loki to ensure scalability, stability, and observability.

Drizystudio

JAN 2025 - MEI 2025

Full-Stack Web Developer

Responsible for the development, maintenance, bug fixing, deployment, and server management of an e-commerce website selling digital design products, using Next.js, NestJS, and TypeScript with PostgreSQL as the database, deployed using containerized Docker. Additionally, involved in design and design slicing to ensure a responsive and user-friendly website layout. This process resulted in a 60% improvement in stakeholder work efficiency and a 40% increase in product sales, thanks to the implementation of a more structured, faster, and stable system.

PT. Neuronworks Indonesia

DEC 2023- DEC 2024

Full-Stack Web Developer

Contributed to the development of a website for clients to complete internet service installation transactions with one of the largest providers in Indonesia. Used JavaScript, jQuery, PHP, and Zend Framework to ensure a smooth user experience and high performance. Managed PostgreSQL and Oracle databases for efficient data storage and processing. The website was designed to enable fast, secure transactions, improve customer satisfaction, and support better service management
